Swedish: Fluent | English: Proficient | Spanish: Native | Driver's License B

PROFESSIONAL PROFILE

Product Designer with a unique background combining advanced visual communication (graphic design), frontend understanding, and modern product methodology. During my time at Fortnox, I worked as an embedded member of the product team (Product Operating Model) with a focus on Continuous Discovery to address complex user needs and drive business value.

I have a strong ability to translate qualitative user insights into accessible (WCAG 2.2), pixel-perfect, and scalable digital interfaces. With deep expertise in Figma architecture (Auto Layout, components, and variables), I build efficient bridges between design and engineering teams.

CORE COMPETENCIES

Product Thinking & UX	UI & Visual Craft (Graphic)	Tech & Collaboration
- Continuous Discovery Habits - UX Research & Usability Testing - User Journey & Service Mapping - Inclusive Design / WCAG 2.2	- Figma (Variables & Design Tokens) - Scalable Components & Libraries - UI Architecture, Layout & Typography - Graphic Production & Branding	- HTML5 / CSS3 / React - Cross-functional Collaboration - Stakeholder Alignment (POM) - Workshop Facilitation (FigJam)

CERTIFICATES & DIPLOMAS

- ✓ **Digital Accessibility and Inclusive Design** — Chas Academy | 2025
- ✓ **UX Design & Frontend Development** — Chas Academy | 2024–2026

WORK EXPERIENCE

UX & Product Designer (Internship)

Fortnox AB, Stockholm | Nov 2025 – Jun 2026

Thesis project: AHR-Motor / Agency Analysis – A dashboard concept for accounting firms focused on data visualisation, time billing and profitability insights.

- Continuous Discovery & Research: Conducted 6 structured usability tests and in-depth interviews to identify friction points in the daily workflows of accounting consultants.
- UI & Design Systems: Sketched and built high-fidelity interactive interfaces in Figma aligned with the product's brand guidelines. Implemented advanced use of components, Auto Layout, and variables for developer hand-off.
- Cross-functional Collaboration (POM): Worked closely with the Product Owner and engineers to validate technical feasibility, design constraints, and business value.
- Accessibility (WCAG): Ensured that the dashboard's data visualisations, colour contrasts, and interaction patterns strictly met accessibility standards in line with WCAG guidelines.
- Evidence-Based Design: Documented the design process using user journeys and hypothesis cards to present strategic decision-making frameworks to stakeholders.

IT Administration & Digital Support

Scandinavian Print Group | Nov 2022 – Apr 2024

- Managed B2B portal clients in the SaaS platforms Haikom and Impleo, gaining deep insight into digital service flows and friction points within system processes.
- Identified recurring pain points in the customer journey, resulting in the optimisation of internal support processes in Freshdesk.

Team Lead – Production & Logistics

Postwork AB / AJ-Eprint | Aug 2012 – Nov 2022

- Full ownership of complex operational production flows from brief to delivery, with an emphasis on quality assurance, time optimisation, and stakeholder coordination.

EDUCATION

UX Design & Frontend Development

Chas Academy | Aug 2024 – Jun 2026

Comprehensive programme covering UX processes, service design, interaction design, and modern frontend development (JavaScript/React). Certificate: Digital accessibility and inclusive design (WCAG).

Cross Media Design – Graphic Design

Fridhems Folkhögskola | Aug 2007 – Aug 2009

Graphic Production (Offset & Digital Printing)

Xenter | Aug 2011 – Jun 2012

ADDITIONAL INFORMATION

- Board Chair of a housing association: Experience in strategic decision-making, stakeholder communication, and managing multi-party processes.
- Technology interest: Actively exploring AI-powered tools in the design process and digital innovation within SaaS.
